Türkiye–Pakistan Experience Sharing Program on Health

Under the Memorandum of Understanding on the Knowledge Sharing Program with the Government of Türkiye, the Health Section of the Ministry of Planning, Development and Special Initiatives organized a webinar on 23–24 February 2026 to facilitate the exchange of health sector experiences and strengthen bilateral cooperation between Pakistan and Türkiye.

This collaborative engagement is expected to strengthen evidence-based planning, enhance the quality of service delivery, and contribute to improved health security in both countries.

The proposed engagement aimed to strengthen bilateral cooperation in the health sector and enhance institutional linkages to improve planning, financing, and implementation of health initiatives.

This knowledge-sharing initiative between the Republic of Türkiye and the Islamic Republic of Pakistan provided a valuable platform to deliberate on important advances made in the health sector including integration of mental health and psychosocial support into primary healthcare, featuring a presentation of the evidence-based MHPSS model and lessons being learnt through its pilot implementation.

The event was also attended by the MHPSS teams in Khyber Pakhtunkhwa and Balochistan.
